Single Variable Early Transcendentals (Fourth Edition) Dennis G. Zill and Warren S. Wright, EBOOK: Calculus: Early Transcendental Functions Robert T. Smith, Roland Minton, 2011-02-16 Students who have used Smith Minton's Calculus say it was easier to read than any other math book they've used. That testimony underscores the success of the authors' approach which combines the best elements of reform with the most reliable aspects of mainstream calculus teaching resulting in a motivating, challenging book. Smith Minton also provide exceptional reality based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include: A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hôpital's Rule in a single section. More concisely written explanations in every chapter. Many new exercises for a total of 7,000 throughout the book that require additional rigor not found in the 2nd Edition. New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects. New commentaries: Beyond Formulas that encourage students to think mathematically beyond the procedures they learn. New counterpoints to the historical notes: Today in Mathematics that stress the contemporary dynamism of mathematical research and applications connecting past contributions to the present. An enhanced discussion of differential equations and additional applications of vector calculus. *Calculus* Dennis Zill, Warren S. Wright, 2009-12-11 Appropriate for the traditional 3-term college calculus course. Calculus Early Transcendentals Fourth Edition provides the student friendly presentation and robust examples and problem sets for which Dennis Zill is known. This outstanding revision incorporates all of the exceptional learning tools that have made Zill's texts a resounding success. He carefully blends the theory and application of important concepts while offering modern applications and problem solving skills.
