Doenges, Mary Frances Moorhouse, 2000 Doenges a clinical specialist Moorhouse a nurse consultant and Geissler a contract practitioner nurse consultant all working out of Colorado Springs Colorado designed this text for both the practicing nurse and nursing student as a reference tool to use in acute care, community, and homecare settings. Nurses' Guide to Clinical Procedures Jean Smith-Temple, 2010 **The PEACE Model Evidence-Based Practice Guide for Clinical Nurses** Joyce Fitzpatrick, Reynaldo Rivera, 2021 Nurses are in charge of the patients and their families throughout the hospital and health system experience. They assist patients through illness to achieve higher levels of health. They coordinate the care throughout the patient's experiences with the healthcare system. Nurses are the leaders of patient care at the bedside and beyond. It is important that as clinical leaders, nurses have the most accurate, most up to date, and evidence based information available so that they can always do the right thing. The PEACE model develops clinical nurses as leaders in care of both patients and their families. Clinical nurses, those at the point of care, have embraced this model for guiding their practice. The PEACE model helps clinical nurses solve challenging problems through a rigorous evidence based practice process from problem identification to evaluation and dissemination. The crux of the PEACE model is the mnemonic that simplifies the evidence based practice (EBP) process for clinical nurses. The PEACE model is used across New York Presbyterian NYP, one of the nation's most comprehensive academic healthcare delivery systems. NYP is composed of 10 hospitals in New York and employs more than 11 000 nurses across the enterprise. One striking advantage of the model is that it emerged from the work of clinical nurses who were struggling to find a way to remember and apply the components of other EBP models. The mnemonic PEACE promotes understanding and application by clinical nurses, providing a way to easily

remember the EBP component stages The uniqueness of the PEACE model is its simplicity This relevance leads to continued application in day to day nursing practice As we strive for peace at many levels of our lives and work the mnemonic is easy to remember The PEACE model may be adapted to any setting where nurses practice **LPN Notes** Ehren Myers,2016-03-03

Doenges,Alice C. Murr,Mary Frances Moorhouse,Christina Baughn,Margaret Moore-Nadler,2024-10-02 In the 11th edition of Nursing Care Plans the authors seek to help nurses move beyond critical thinking to apply nursing knowledge that guides their clinical judgments The cognitive process applied to reach clinical judgments is intended to and does improve nursing practice and client outcomes Indeed nurses knowledgeable and wise clinical judgments demonstrate the increased value and worth of the nursing profession to help improve the healthcare system Thus nursing must take action to expand nurses roles and responsibilities in nursing practice for greater improvements in healthcare To meet the challenges of client care competently the nurse must have up to date assessment skills and a working knowledge of pathophysiological concepts concerning the common diseases and conditions presented This book is designed for students who will find the plans of care helpful as they learn and develop skills in applying the nursing process and using nursing diagnoses It will complement their classroom work support the critical thinking process and assist in developing clinical judgment The book also provides a ready reference for practicing nurses as a catalyst for thought in planning evaluating and documenting care *Nurse Executive Review and Resource Manual* Al Rundio, Virginia Wilson,2013-06-17 *Guidelines for Nursing Excellence in the Care of Children, Youth, and Families* Cecily Lynn Betz,Marilyn J.
