Bushe,Mario Brock,Margareta Klinger,2012-12-06 Demands on a Neurosurgeon Under Routine Clinical Conditions Hardly any other field of surgery requires such meticulous asepsis No other field requires such a protection of the tissue and such reliable hemostasis No one will question that neurosurgery makes exceedingly high demands However the degree of the demands on the personality of the surgeon who has to carry out very serious operations to the exclusion of all others and has little opportunity to recover psychologically by working on simpler cases is concealed from the outer world The mental strain which the coworkers and staff have to tolerate may not be denied So wrote Wilhelm Tonnies in 1939 Although fifty years have now elapsed his appraisal is still relevant today hence my intention to discuss the everyday demands placed on neurosurgeons My aim is not self glorification to engender sympathy rather it is to highlight the effects and repercussions of such demands for the well being of the patients entrusted to us The major onerous demands include those in the operating theater those resulting from staff problems in nursing those resulting from legal developments those resulting from the increasing administrative tasks that cost valuable time and energy which are lost to our actual work in looking after patients science and research also suffer from this I shall not go into the latter point within this preface Let me first turn to the strains occurring in the operating theater Ethical And Legal Issues In Modern Surgery Nadey S Hakim,Vassilios E Papalois,Miran Epstein,2014-12-18 Over the last quarter of a century the fields of medical ethics and of legal issues related to medical practice have rapidly developed for a number of reasons Firstly the provision of healthcare nowadays is based on a complicated partnership between healthcare providers patients administrators and organizations responsible for providing finance this complicated partnership frequently results in clashes of views opinions and priorities

which have a major ethical and legal dimension Secondly a major event of the 21st century is the development of multicultural societies healthcare related decisions thus have to be made on the background of so many different ethnicities religions cultures and languages resulting in a great spectrum of ethical and legal implications Thirdly in the modern world people are more mobile and can easily and cost effectively seek treatment outside of their country of origin or residence which raises many ethical and legal issues Lastly the development of new medical specialties modern and advanced treatments for very challenging patients and the introduction of new technologies in medical practice have dramatically broadened the spectrum of ethical and legal issues related to medical practice This book will therefore aim to cover in detail general principles and specific issues related to the ethical and legal dimensions of modern surgical practice
