Morales, 2018-09-03 This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years From a general point of view coasts are the most quickly changing systems of the Earth This is critical since many human resources such as the main part of economic and social activities are located in the coastal areas Especially in the case of Spain these coasts include cities wide industrial areas including harbor complexes important ecologic systems and our main economic resource tourism Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management so as to solve problems derived from bad plans developed in the last decades of the twentieth century This is a valuable text for advanced graduate students and coastal researchers which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities **Rock Coast Geomorphology** D.M. Kennedy, W.J. Stephenson, L.A. Naylor, 2014-08-20 Rocky landforms dominate large portions of the world's coast Cliffs and shore platforms form spectacular landscapes yet when compared to other landforms they are relatively unstudied with many contemporary controversies dating back to the mid nineteenth century The past decade has seen a reinvigoration of research driven by advances in technology that now enable precise measurements of erosion to the micron scale and quantification of wave energy onto and through cliff edifices to be made as well as being able to directly date rock surfaces In order to integrate this diverse range of research this volume's regional approach first integrates the latest data with longstanding theory and then analyses this research through the boundary conditions that exist in each area The volume brings together the research leaders in the field includes chapters on nearly all the major rock coasts of the world and identifies future research needs Australian Caves and Karst Systems John Webb, Susan White, Garry K.

Smith,2023-08-31 This book part of the series Cave and Karst Systems of the World begins with a review of the interaction between people and caves in Australia including conservation followed by descriptions of the spectacular cave diving sites before comprehensively covering all the major carbonate and noncarbonate karst areas subdivided by rock type and region and including the origin of the caves This is followed by broad overviews of cave minerals and speleothems cave biology and cave fossils Each section was written by one or more specialists in the topic and is illustrated by clear diagrams and superb colour photos The book emphasises the unique aspects of the Australian karst including the variability in the age of the caves very old to very young and the impact of isolation on the stygofauna as well as the vertebrate fossils preserved in the caves Written in an easy to read style the book is a primary reference guide to Australian karst and represents a valuable asset for anyone interested in the topic not only cavers and academics

The Karst Systems of Florida Sam Upchurch,Thomas M. Scott,MICHAEL ALFIERI,Beth Fratesi,Thomas L.
