Claude C Hopkins Scientific Advertising:

Scientific advertising Claude C. Hopkins, 2022-09-06 The time has come when advertising has in some hands reached the status of a science It is based on fixed principles and is reasonably exact The causes and effects have been analyzed until they are well understood The correct methods of procedure have been proved and established We know what is most effective and we act on basic laws Advertising once a gamble has thus become under able direction one of the safest business ventures Certainly no other enterprise with comparable possibilities need involve so little risk Therefore this book deals not with theories and opinions but with well proved principles and facts It is written as a text book for students and a safe guide for advertisers Every statement has been weighed The book is confined to established fundamentals If we enter any realms of uncertainty we shall carefully denote them The present status of advertising is due to many reasons Much national advertising has long been handled by large organizations known as advertising agencies Some of these agencies in their hundreds of campaigns have tested and compared the thousands of plans and ideas The results have been watched and recorded so no lessons have been lost Such agencies employ a high grade of talent None but able and experienced men can meet the requirements in national advertising Working in cooperation learning from each other and from each new undertaking some of these men develop into masters Individuals may come and go but they leave their records and ideas behind them These become a part of the organization s equipment and a guide to all who follow Thus in the course of decades such agencies become storehouses of advertising experiences proved principles and methods The larger agencies also come into intimate contact with experts in every department of business Their clients are usually dominating concerns So they see the results of countless methods and policies They become a clearing house for everything pertaining to merchandising Nearly every selling question which arises in business is accurately answered by many experiences Under these conditions where they long exist advertising and merchandising become exact sciences Every course is charted The compass of accurate knowledge directs the shortest safest cheapest course to any destination We learn the principles and prove them by repeated tests This is done through keyed advertising by traced returns largely by the use of coupons We compare one way with many others backward and forward and record the results When one method invariably proves best that method becomes a fixed principle

Worstell, Claude C.

Hopkins, 2014-05-29 This book is not written as a personal history but as a business story I have tried to avoid trivialities and to confine myself to matters of instructive interest The chief object behind every episode is to offer helpful suggestions to those who will follow me And to save them some of the midnight groping which I did My only claim for credit is that I have probably worked twice as long as anybody else in this field I have lived for many years in a vortex of advertising Naturally I learned more from experience than those who had a lesser chance Now I want that experience so far as possible to help others avoid the same difficult climb Every pioneer should blaze his trail That is all I have tried to do I set down these findings solely for the purpose of aiding others to start far up the heights I scaled Then with the efforts I here describe I hope you can now attain some peaks in advertising beyond any of us to date Claude C Hopkins **Scientific Advertising** Claude Hopkins, 2024-12-27
