Building Cloud Apps with Microsoft Azure Scott Guthrie, Mark Simms, Tom Dykstra, 2014-07-17 This ebook walks you through a patterns based approach to building real world cloud solutions. The patterns apply to the development process as well as to architecture and coding practices. The content is based on a presentation developed by Scott Guthrie and delivered by him at the Norwegian Developers Conference NDC in June of 2013 part 1 part 2 and at Microsoft Tech Ed Australia in September 2013 part 1 part 2. Many others updated and augmented the content while transitioning it from video to written form. Who should read this book? Developers who are curious about developing for the cloud, are considering a move to the cloud, or are new to cloud development will find here a concise overview of the most important concepts and practices they need to know. The concepts are illustrated with concrete examples and each chapter includes links to other resources that provide more in depth information. The examples and the links to additional resources are for Microsoft frameworks and services but the principles illustrated apply to other web development frameworks and cloud environments as well. Developers who are already developing for the cloud may find ideas here that will help make them more successful. Each chapter in the series can be read independently so you can pick and choose topics that you're interested in. Anyone who watched Scott Guthrie's Building Real World Cloud Apps with Windows Azure presentation and wants more details and updated information will find that here.
