Development And Causality Neo Piagetian Perspectives:

Development and Causality Gerald Young, 2011-06-24 This book sets forth a new model of development from a causal perspective. As this is an area vital to several disciplines, it has been written at multiple levels and for multiple audiences. It is based on the work of Piaget and Neo Piagetians but also covers other major models in development. It has elements that make it attractive as a teaching text but it is especially research focused. It has clinical applications. It presents many new ideas and models consistent with the existing literature which is reviewed extensively. Students, researchers, and practitioners should find it useful. The models presented in the present work build on models introduced in prior publications, e.g., Young 1990a, 1990b, 1997.

Causality and Neo-Stages in Development Gerald Young, 2021-10-30 This book represents a broad integration of several major themes in psychology toward its unification. Unifying psychology is an ongoing project that has no end point, but the present work suggests several major axes toward that end, including causality and activation/inhibition/coordination. On the development side of the model building, the author has constructed an integrated lifespan stage model of development across the Piagetian cognitive and the Eriksonian socioaffective domains. The model is based on the concept of neo stages which mitigates standard criticisms of developmental stage models. The new work in the second half of the book extends the primary work in the first half both in terms of causality and development. Also, the area of couple work is examined from the stage perspective. Finally, new concepts related to the main themes are represented, including on the science formula, executive function, stress, dysregulation, disorder, inner peace, and ethics, all toward showing the rich potential of the present modeling.

Causality and Development Gerald Young, 2019-02-28 The third book in Young's unique trilogy on causality and development continues to locate and define the central role of causality in biopsychosocial and network systems development and as a unifying concept of psychology itself. As a way of discussing causality in general, initially the book focuses on the acquisition of handedness and hemispheric specialization in infancy and childhood and their relations to the development of cognition, language, and emotion in particular. The second part of the book elaborates an innovative 25-step Neo Eriksonian model of development across the life course based on a Neo Piagetian model covered in the previous books, completing a step-by-step account of development over the lifespan cognitively and socio-emotionally. It builds on the concept of neo stage which is network based. From this conceptual synthesis, the author's robust theory of development and causality identifies potential areas for psychological problems and pathology at each developmental step as well as science-based possibilities for their treatment. This elegant volume presents a clear picture of the development of handedness and laterality in more depth than has been attempted in the literature to date. Traces the causal concepts of activation/inhibition/coordination and networking in the context of development. Describes in depth a novel 25-step Neo Eriksonian lifespan model of development. Reviews relevant research on Piagetian and Eriksonian theories in development. Emphasizes the clinical utility of the described 25-step Neo Eriksonian approach to lifespan development. A significant step in understanding this

highly nuanced subject and synthesizing a broad knowledge base Causality and Development will find an interested audience among developmental psychologists mental health practitioners academics and researchers chers

Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury Gerald Young, 2014-02-11 This book is a comprehensive analysis of the definitions, concepts and recent research on malingering, feigning and other response biases in psychological injury forensic disability populations. It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD, chronic pain and TBI. Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists. In *Malingering, Feigning and Response Style Assessment in Psychiatric Psychological Injury* Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD, pain and TBI. He does so thoroughly and very even handedly, neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering. He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD. These are conservative and well grounded in the prior literature. Finally, the book contains dozens of very recent references giving testament to Dr Young's immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for *Psychological Injury and the Law*.
