How European Citizens Understand the Economy Dorian Alt, 2023-06-02 This book argues that the European public sphere functions to help citizens understand complex economic issues and discuss them meaningfully across borders Through original research conducted on citizens perceptions of European economic issues it explores a mechanism that allows people to make sense of such complex issues national anchoring and shows that the way issues are politicized today in a national public sphere will shape citizens understandings of novel issues tomorrow The book demonstrates that debates in the European public sphere spread knowledge to the population just as national debates do thus allowing transnational deliberation to function in the EU and potentially advance a European identity The book thus draws optimistic conclusions with regard to EU legitimacy with the European public sphere functioning rather well and problems of complexity and compatibility seeming less pronounced than often expected in public opinion research and European studies This book will be of key interest to scholars and students of public opinion European studies political attitudes austerity politics and more broadly to political science sociology and social psychology *Everyday Europe* Ettore Recchi, Adrian Favell, Fulya

Apaydin, Roxana Barbulescu, Michael Braun, Irina Ciornei, Niall Cunningham, Juan Diez Medrano, Deniz Neriman Duru, Laurie Hanquinet, Janne Solgaard Jensen, Steffen Pötzschke, David Reimer, Justyna Salamonska, Mike Savage, Albert Varela, 2019-02-13 Drawing on unique research and rich data on cross border practices this book offers an empirically based view on Europeans interconnections in everyday life It looks at the ways in which EU residents have been getting closer across national frontiers in their everyday experiences of foreign countries work travel personal networks but also their knowledge consumption of foreign products and attitudes towards foreign culture These evolving European dimensions have been enabled by the EU backed legal opening to transnational economic and cultural transactions while also differing according to national contexts The book considers how people reconcile their increasing cross border interconnections and a politically separating Europe of nation states and national interests **Independence and Legitimacy in the**

Institutional System of the European Union Dominique Ritleng, 2016-02-11 As EU non majoritarian bodies such as the

European Commission the Court of Justice of the European Union and the European Central Bank grow in political influence many have identified the pressing need to keep these bodies accountable to the repositories of the EU's democratic legitimacy This collection of essays sheds light on the inherent tension between independence and legitimacy in the EU's institutional system and explores the options of reconciling the two Featuring analysis from both legal and political perspectives the volume assesses whether to what extent and how it is possible to control the various EU independent bodies and make them answerable for what they do while at the same time upholding their independence **European**

Democracy as Demoi-cracy Francis Cheneval, Sandra Lavenex, Frank Schimmelfennig, 2017-10-02 Whereas democracy assumes a single demos or people demoi cracy refers to democratic government and governance in a polity constituted by separate peoples Since the European Union consists of many demoi with different collective identities largely separate public spheres and a predominantly national political infrastructure demoi cracy is an appropriate standard for the analysis and evaluation of democracy in the EU In its vertical dimension demoi cracy is based on the equality and interaction of citizens and statespeoples representatives in the making of common policies Horizontally it seeks to balance equal transnational rights of citizens with national policy making autonomy This volume offers exemplary studies exploring the potential for and the workings of demoi cracy in the EU across a broad range of institutions and issues in both its vertical and horizontal dimensions In particular the contributions address the following questions Is demoi cracy relevant to citizen attitudes and public discourse on the EU's legitimacy How do national and supranational democratic institutions interact Do the EU's modes of governance such as regulation through agencies mutual recognition and the open method of coordination meet demoi cratic expectations This book was originally published as a special issue of the Journal of European Public Policy

The European Union Simona Piattoni, 2015 This volume seeks to answer the question Which institutional architecture for which kind of democracy for the EU and discusses a series of institutional architectures in light of the democratic quality of the processes and decisions generated by them **Candidates, Parties and Voters in the Belgian Partitocracy**

Audrey Vandeleene, Lieven De Winter, Pierre Baudewyns, 2018-11-03 This book focuses on the triadic relationship between electoral candidates and the two other poles of the delegation and accountability triangle political parties and voters The chapters rely mostly on the Belgian Candidate Survey CCS project gathering about 2000 candidates belonging to 15 parties represented in Parliament and running for the 2014 federal and regional elections and the authors conclusions serve at answering broad political science questions linked with elite recruitment party and candidate electoral strategies personalisation party cohesion and descriptive and substantive representation Its multilevel semi open electoral system atypical federal structure extreme party system fragmentation and volatility make Belgium an exceptionally rich but complex case that offers findings highly relevant to research on candidates in other democracies **Towards a European Society?**

Ronald Pohoryles, Saša Božić, 2018-10-08 In the aftermath of the Maastricht Treaty Europe saw tremendous integration but

the last few years have seen a new power game between federalist and confederalist actors Although the Lisbon Treaty increased the power of the federalist inclined European Parliament the politics of the European Council are marked by a confederalist approach that re affirms the power of the individual member states As the European Council gains in strength it supports the idea that EU policies should act as a means to protect individual national interests rather than as a positive sum game to the benefit of all member states This national egoism as a political strategy is paralleled by the rise of nationalism in many member states as a result of which we are faced with an increase in social inequality due to unequal social rights and social exclusion of minorities an increase of social control disguised as security policy nostalgic cultural policies that emphasize the national cultural heritage and migration control that threatens the Schengen Agreement These developments pose a challenge for European social science scholars both theoretically and based on practical experience from their research activities International cooperation has improved theoretical and methodological knowledge in a major way and academic exchange and migration have led to innovation in science and research Since academic communities support further internationalization and Europeanization and are opposed to all types of barriers between the nation states there is a need to theoretically conceptually and empirically research the idea of a European society This book was originally published as a special issue of Innovation The European Journal of Social Science Research

The French Parliament and the European Union Olivier Rozenberg, 2019-07-12 This book explores how the European Union has changed the French Parliament since 1992 It supports the view that the institutional adaptation of both assemblies to European affairs is largely superficial as it lacks a genuine involvement from members of parliament Nevertheless the role of backbenchers has changed in the context of European integration New ways of behaving thinking and representing have emerged From specialized representatives to constituency members from presidential aspirants to Eurosceptic sovereigntists French national parliamentarians have adapted differently to the EU Far beyond the sole scrutiny of European draft legislation the book provides a comprehensive map of this changing environment It supports the view that the process has been driven by the search for day to day emotional gratifications rather than utilitarian strategies
