Consumer Technology Handbook Amit Dhir, 2004-04-30 The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles, even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. This handbook is a much needed comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances, and networking systems. Each chapter follows a logical progression from a general overview of each device to market dynamics to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications devices, gaming consoles, DVD players, PCs and peripherals, display devices, digital imaging devices, web terminals and pads, PDAs and other handhelds, screenphones, videophones, telematics devices, eBooks, and readers, and many other current and future products. To receive a FREE daily newsletter on displays and consumer electronics, go to <http://www.displaydaily.com>. Surveys crucial engineering information for every digital consumer product category, including cell phones, digital TVs, digital cameras, PDAs, and many more, the only reference available to do so. Has extremely broad market appeal to embedded systems professionals, including engineers, programmers, engineering managers, marketing and sales personnel. 1,000,000 potential readers. Helps engineers and managers make the correct design decisions based on real world data.

Popular Science, 1982-02 Popular Science gives our readers the information and tools to improve their technology and their world.
