Herman Hoeksema: A Theological Biography Patrick Baskwell, 2009-07-01 The historic development of the theology of Herman Hoeksema presented as a biography by Dr Patrick Baskwell Theology Professor at ST Petersburg Theological Seminary 334 pages paperback

Handbook of Dutch Church History Herman J. Selderhuis, 2014-12-10 Herman Selderhuis as editor of this volume has brought together a team of experts resulting in a unique approach since each chapter is co written by a catholic and a protestant author who have all integrated the latest research results Each section begins with a brief historiographical overview The same time ecclesiastical events are always set within a greater framework of political social and cultural developments for which reason each author has taken the liberty to describe its own method The user will find in this book tables diagrams and illustrations Also many source texts are integrated in the narration These texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words The name of the book as Handbook of the church history of the Netherlands immediately brings to mind three problematic complexes which are relevant to its user First there is the nature of a handbook that is intended to be a good tool but also has its limitations it stimulates and necessitates the use of further books Second the area The Netherlands is a plurality and that is also noticeable in its church history for each region town and village has its own church history Third the history of the church for sure is the most important aspect but this history can only be understood if it is described in the context of political and social developments

Servants of the Kingdom David Bos, 2010-06-14 Minister of the Word shepherd and teacher the titles of Dutch pastors exude authority and prestige In the course of the nineteenth century however their social position was slowly undermined by the separation of church and state the emancipation of Catholics and dissenters and the rise of all sorts of secular shepherds and teachers This work of historical sociology analyzes the development of the profession of pastor in the Netherlands Reformed Church focusing on pastors changing relationships with the state the universities other professions and their own congregants It paints a surprising lively and often humorous picture of nineteenth century ecclesiastical and religious life and of the many areas of Dutch society and culture where pastors made their mark in particular the literary world

Family Quarrels in the Dutch Reformed Churches in the Nineteenth Century Robert P. Swierenga, Elton J. Bruins, 1999 Volume 32 in the HSRCA series chronicles the internal quarrels that have occurred in RCA history particularly the landmark secessions that occurred in 1850 1857 and 1882 While exploring the unity and disunity that have characterized the RCA since the Dutch immigration to the United States this study also points out the righteous motivations that lay behind these struggles and shows how these historic quarrels have their counterpart in contemporary debates over the ordination of women and the church's acceptance of homosexuals

Religious Identity and the Problem of Historical Foundation Judith Frishman, Willemien Otten, Gerard Rouwhorst, 2004-02-01 The essays collected in this book deal with the question how throughout the history of Christianity Christian communities have tried to construct their identity by anchoring their views in authoritative and normative sources The main focus is upon the problem of historical foundation through textual traditions but other authoritative sources role of religious leaders ritual traditions are taken into consideration as well The book takes as its point of departure the fact that with the rise of modernity the former dependence of western church and society on authoritative sources was called into question Ever since appeal to such sources is no longer self evident at times it is even regarded as problematic Based on this radical change brought about by modernity the book is divided in two main parts The first part deals with the question how Christian churches and confessions Roman Catholic and Protestant confronted modernity and which role was played by authoritative sources in the tradition to the modern era Special attention will be paid to the way in which Judaism reacted to many of the same impulses both societal and religious ones The second part deals with the premodern period from early Christianity to the post Reformation era and focuses on the role authoritative traditions textual or otherwise have played in providing various Christian communities with a relative stable identity The aim of the book is to elucidate processes resulting in the formation of authoritative traditions as well as the effects of these traditions on the identity of Christian and Jewish communities In addition the book attempts to clarify the various ways in which Christian and Jewish communities have reacted to the growing suspicion authoritative traditions aroused in the western world since the rise of modernity

Psychohistory in Psychology of Religion ,2021-11-22 Psychology of religion is one of the rare fields in psychology where an interdisciplinary approach has been preserved Psychohistory especially understood as the systematic application of psychological knowledge in explorations of the past has enjoyed substantial attention Traditionally the emphasis in such studies has been on biographical research This

volume attempts to broaden the horizon and to include studies of phenomena as well on a group or subcultural level The volume contains chapters on such subjects as apparitions of the Virgin Mary in Belgium attitudes towards suicide in seventeenth century Sweden the pillarization of Dutch Calvinists There are also studies of famous individuals such as Hitler Stalin Freud Van Gogh and J H Newman Among the contributors are well known authors like Donald Capps Michael P Carroll William W Meissner Ana Mar a Rizzuto and Antoine Vergote

Towards Cultural Psychology of Religion Jacob A. v. van Belzen, 2010-08-03 The aims pursued in this book are quite modest The text is not an introduction in the traditional sense to any psychological subdiscipline or field of application nor does it present anything essentially new Rather it shows work in progress as it attempts to contribute to an integration of two differently structured but already existing fields within psychology In order to explain this it is probably best to say a few words about how the book came into being and about what it hopes to achieve As a project the volume owes very much to others While lecturing in places ranging from South Africa to Canada and from California through European countries to Korea colleagues have often urged me to come up with a volume on cultural psychology of religion For reasons that should become clear in the text I feel uncomfortable with such a demand To my understanding there exists no single cultural psychology of religion Rather there are ever expanding numbers of divergent types of psychologies some of which are applied to understanding religious aspects of human lives or to researching specific religious phenomena while others are not Within this heterogeneous field that is correctly or not still designated as psychology there are also many approaches that are sometimes referred to as cultural psychology or as culturally sensitive psychologies It would be wor while applying many of these to research on religious phenomena but at present not too many are in fact so applied

Religious Currents and Cross-Currents: Essays on Early Modern Protestantism and the Protestant Enlightenment Johannes van den Berg, 2021-11-01 The religious history of seventeenth and eighteenth century Protestantism was marked by a twofold movement On the one hand there were attempts to consolidate and if necessary to reaffirm the heritage of the Reformation on the other hand we meet a growing critical evaluation of the legacy of mainstream orthodox thought which could lead to a process of gradual renewal and reorientation but also to forms of more radical and controversial criticism Conservative as well as critical tendencies can be discerned in the religious landscape on both sides of the North Sea In spite of differences in the historical framework and spiritual culture the developments in Great Britain and on the Continent often present remarkable parallels and the water of the North Sea was not too deep for creative interaction This volume contains a number of essays which deal with various aspects of English and Dutch church history and theology in the seventeenth and eighteenth centuries Special attention is given to the problems surrounding the Calvinist doctrine of predestination to English Puritanism and its impact on the Netherlands to Jewish Christian relations and polemics in the seventeenth century to seventeenth century millenarianism in particular in the circle of the Cambridge Platonists to the attitude of Dutch Reformed theologians to the Church of England to eighteenth century English and Dutch orientalist studies

and to the development of enlightened ideas in the circles of English and Dutch Protestantism
