Clock Mirror Girolamo Renaissance Princeton:

The Clock and the Mirror Nancy G. Siraisi, 1997 Girolamo Cardano's writings on medicine reflect both the complexity and diversity of the Renaissance medical world and the breadth of his own interests. This book draws on selected themes of in Cardano's medical writings to explore the relation between medicine and Renaissance *Negotiating the French Pox in Early Modern Germany* Claudia Stein, 2016-12-05 This book explores the identity of the French disease alias the French pox or Morbus Gallicus in the German Imperial city of Augsburg between 1495 and 1630. Rejecting the imposition of modern conceptions of disease upon the past, it reveals how early modern medical theory facilitated enormous flexibility in defining disease and how disease identification was a local matter and one of constant negotiation and renegotiation. Drawing on a wealth of primary source material, this work combines concern with the conceptualisation of the disease with its practical application and argues for the inseparability of both. It focuses on how theoretical understanding of the pox shaped the various therapeutic reactions and vice versa. It exemplifies this in the specific socio-cultural context of sixteenth and seventeenth century Augsburg through an investigation of the city's municipal and private pox hospitals. Combining medical, religious, economic, municipal, and institutional history, this book offers a fascinating insight into how early modern society came to terms with disease both in a practical and theoretical sense. This revised English translation of Dr Stein's original German book adds new layers of understanding to a fascinating but complex subject. **Witchcraft and Inquisition in**

Early Modern Venice Jonathan Seitz, 2011-08-08 In early modern Europe, ideas about nature, God, demons, and occult forces were inextricably connected, and much ink and blood was spilled in arguments over the characteristics and boundaries of nature and the supernatural. Seitz uses records of Inquisition witchcraft trials in Venice to uncover how individuals across society, from servants to aristocrats, understood these two fundamental categories. Others have examined this issue from the points of view of religious history, the history of science and medicine, or the history of witchcraft alone, but this work brings these sub-fields together to illuminate comprehensively the complex forces shaping early modern beliefs. **Mechanism,**

Experiment, Disease Domenico Bertoloni Meli, 2011-05-02 A leading early modern anatomist and physician, Marcello Malpighi often compared himself to that period's other great mind, Galileo. Domenico Bertoloni Meli here explores Malpighi's work and places it in the context of seventeenth-century intellectual life. Malpighi's interests were wide and varied. As a professor at the University of Bologna, he confirmed William Harvey's theory of the circulation of blood, published groundbreaking studies of human organs, made important discoveries about the anatomy of silkworms, and examined the properties of plants. He sought to apply his findings to medical practice. By analyzing Malpighi's work, the author provides novel perspectives not only on the history of anatomy but also on the histories of science, philosophy, and medicine. Through the lens of Malpighi and his work, Bertoloni Meli investigates a range of important themes, from sense perception to the meaning of Galenism in the seventeenth century. Bertoloni Meli contends that to study science and medicine in the

seventeenth century one needs to understand how scholars and ideas crossed disciplinary boundaries He examines Malpighi's work within this context describing how anatomical knowledge was achieved and transmitted and how those processes interacted with the experimental and mechanical philosophies natural history and medical practice Malpighi was central in all of these developments and his work helped redefine the intellectual horizon of the time Bertoloni Meli's critical study of this key figure and the works of his contemporaries including Borelli Swammerdam Redi and Ruysch opens a wonderful window onto the scientific and medical worlds of the seventeenth century

Janello Torriani and the Spanish Empire
Cristiano Zanetti, 2017-07-10 Janello Torriani known in the Spanish speaking world as Juanelo Turriano Cremona Italy ca 1500 Toledo Spain 1585 is the greatest among Renaissance inventors and constructors of machines Contemporary literates and mathematicians celebrated Janello Torriani and his creations in their writings It is striking how such fame turned into nearly complete oblivion leaving only a few clues of a blurred and distorted memory dispersed here and there This book wishes to show the central role that artisans formed in the Vitruvian tradition played in demonstrating through practical mathematics an increasing and positive control over Nature a step rooted in humanist culture and foundational for the understanding of those historical processes known as the Scientific and the Industrial Revolutions

Mysteries and Secrets Revealed
Loren Pankratz, 2021-04-01 Mysteries and Secrets Revealed uncovers the reality behind mysteries of nature and secrets of frauds that eluded common understanding The journey begins in the ancient Greek city of Delphi where priests claimed the gift of a priceless gold lion was an acknowledgement of their clairvoyant powers But their concocted story concealed an embarrassing blunder Those sufficiently savvy to catch the lie became aware of even deeper problems Author Loren Pankratz then guides us through the conflicts of Renaissance scholars including Galileo who explained things in ways that enraged philosophers and infuriated priests Galileo's methods of investigation were perpetuated by the meticulous work of the Academy of Experiment and Bernard Fontenelle's enthralling dialogue enabled common people to accept life in the rearranged sun centered universe Clairvoyants in a mesmeric trance claimed they could visit distant planets and endure brutal surgical procedures If any of this was real how was it possible One nineteenth century mesmeric savant Alexis Didier was so convincing that someone claimed no case of clairvoyance could be made for anyone if his accomplishments were not real This unchallenged declaration is now unraveled here for the first time through information gleaned from uncommon documents and rare antiquarian pamphlets The surprising manifestations of modern spiritualism quickly escalated into a psychic arms race that included mysterious tipping and turning of tables Scientist Michael Faraday devised ingenious experiments to show how subtle muscle reactions outside of awareness created these manifestations On the other hand explanations for table levitations and mysterious writing on slates could only be solved by individuals with acute observational skills and acquainted with the methods of trickery Each story in Mysteries and Secrets Revealed captures the tension of conflict the thrill of discovery and the strategies of science that unmasked frauds fakes false belief and the

enigmas of our natural world **Michelangelo and the English Martyrs** Anne Dillon, 2016-12-05 In May 1555 a broadsheet was produced in Rome depicting the torture and execution in London and York of the Carthusians of the Charterhouses of London Axeholme Beauvale and Sheen during the reign of Henry VIII This single page martyrology provides the basis for an in depth exploration of several interconnected artistic scientific and scholarly communities active in Rome in 1555 which are identified as having being involved in its production Their work and concerns which reflect their time and intellectual environment are deeply embedded in the broadsheet especially those occupying the groups and individuals who came to be known as Spirituali and in particular those associated with Cardinal Reginald Pole who is shown to have played a key role in its production Following an examination of the text and a discussion of the narrative intentions of its producers a systematic analysis is made of the images This reveals that the structure content and intention of what at first sight seems to be nothing more than a confessionally charged Catholic image of the English Carthusian martyrs typical of the genre of propaganda produced during the Reformation is astonishingly dominated by the most celebrated name of the Italian Renaissance the artist Michelangelo Buonarroti Not only are there direct borrowings from two works by Michelangelo which had just been completed in Rome The Conversion of St Paul and The Crucifixion of St Peter in the Pauline Chapel but many other of his works are deliberately cited by the broadsheet s producers Through the use of a variety of artistic scientific and historical approaches the author makes a compelling case for the reasons for Michelangelo s presence in the broadsheet and his influence on its design and production The book not only demonstrates Michelangelo s close relationship with notable Catholic reformers but shows him to have been at the heart of the English Counter Reformation at its inception This detailed analysis of the broadsheet also throws fresh light on the Marian religious policy in England in 1555 the influence of Spain and the broader preoccupations of the Counter Reformation papacy while at the same time enriching our understanding of martyrology across the confessional divide of the Reformation **Occult Knowledge, Science, and Gender on the**

Shakespearean Stage Mary Floyd-Wilson, 2013-07-11 Belief in spirits demons and the occult was commonplace in the early modern period as was the view that these forces could be used to manipulate nature and produce new knowledge In this groundbreaking study Mary Floyd Wilson explores these beliefs in relation to women and scientific knowledge arguing that the early modern English understood their emotions and behavior to be influenced by hidden sympathies and antipathies in the natural world Focusing on Twelfth Night Arden of Faversham A Warning for Fair Women All s Well That Ends Well The Changeling and The Duchess of Malfi she demonstrates how these plays stage questions about whether women have privileged access to nature s secrets and whether their bodies possess hidden occult qualities Discussing the relationship between scientific discourse and the occult she goes on to argue that as experiential evidence gained scientific ground women s presumed intimacy with nature s secrets was either diminished or demonized *Rhetoric and Medicine in Early Modern Europe* Nancy S.
