**Cloning Agricultural Plants Via in Vitro Techniques** Bob V. Conger, 2018-01-31 The purpose of this book is to provide a reference guide on principles and practices of cloning agricultural plants via in vitro techniques for scientists students commercial propagators and other individuals who are interested in plant cell and tissue culture especially its application for cloning Plant cell and tissue culture generated much excitement during 1970 s concerning the potential application of the technology for improving important agricultural crop plants This originates from the demonstration of cellular totipotency or the ability to regenerate whole plants from single cells and the successful creation of hybrids by somatic cell fusion in some species There are several areas of in vitro culture which have potential practical application The most practical application is deemed as cloning or mass propagation of selected genotypes This is evidenced by the large number of commercial firms engaged in propagating a variety of plants through tissue culture **CLONING**

used to be regarded as the scientia amabilis the friendly science eminently suitable for leisured amateurs Since then and particularly in this century it has grown tremendously in its importance and in its intimate contacts with various other disciplines of science some of which like plant genetics and plant physiology at one time indeed used to be included under the broad term botany In spite of the fact that such subjects have expanded into major scientific fields of their own botany the mother science continues to maintain its central place this is because it deals with plants which constitute one of the most vital life supporting systems of this planet Furthermore interacting and benefiting from advances made in other

sciences it has steadily progressed in a number of areas Experimental embryology of vascular plants is one such field where spectacular advances have been made in recent years The time is therefore particularly opportune for the publication of an authoritative book on the subject It is very appropriate that the book has been planned and edited by Professor B M Johri one of India s foremost botanists whose contributions in embryology plant morphology and morphogenesis are internationally known He was closely associated over a number of years with Professor P Maheshwari the great botanist and embryologist to whom the book is dedicated

Trees I Y. P. S. Bajaj, 2012-12-06 Biotechnology has come to a stage where by replacing some of the age old practices of breeding it can produce novel and improved plants and animals that can better serve human beings and their purposes The techniques of cellular and subcellular engineering such as gene splicing and recombinant DNA cloning hybridomas and monoclonal anti bodies production of human insulin protein engineering industrial fermentation artificial insemination cryopreservation and ovum transfer plant tissue culture and somatic hybridization nitrogen fixation phytomass production for biofuels etc have advanced greatly in the past decade due to the availability of better equipment and the consolidation of knowledge Product orientation has removed biotechnology from the area of pure academic interest to one of utility where the final product is a spur to action Businesses have started pouring money into projects which has aided greatly in improving equipment information exchange and arousing the interest and imagination of the public The common goal of science industry and the public opens wide vistas and great hopes for biotechnology The business of biotechnology addresses itself to issues of factory farming technology transfer joint ventures international cooperation and to specific topics as well as the production of diagnostic kits Industry is particularly concerned with the pharmaceutical field and microbial biotechnology from which profitable return can accrue Commercial interests have led to better management practices and systematisation
