Computer Mathematics for Programmers Darrell H. Abney, Laurence Rubin, Donald W. Sibrel, 2014-05-09 Computer Mathematics for Programmers presents the Mathematics that is essential to the computer programmer The book is comprised of 10 chapters The first chapter introduces several computer number systems Chapter 2 shows how to perform arithmetic operations using the number systems introduced in Chapter 1 The third chapter covers the way numbers are stored in computers how the computer performs arithmetic on real numbers and integers and how round off errors are generated in computer programs Chapter 4 details the use of algorithms and flowcharting as problem solving tools for computer programming Subsequent chapters focuses on specific mathematical topics such as algebra sets logic Boolean algebra matrices graphing and linear programming and statistics Students of computer programming will find the text very useful *Introduction to computer mathematics* Russell Merris, 1985 **Computer Mathematics** D. J. Cooke, H. E. Bez, 1984-05-24 Computing is an exact science and the systematic study of any aspect necessarily involves the use of mathematical models Moreover the rate at which the subject is evolving demands a facility for developing new mathematical systems to keep pace with new computing systems and this requires an appreciation of how mathematics works An understanding of the underlying mathematical structure facilitates the construction of suitable computer programs to perform computations Assuming no specific knowledge of mathematics the authors describe all the basic concepts required and progress from sets rather than numbers through a variety of algebraic structures that permit the precise description specification and subsequent analysis of many problems in computing The material included provides the essential mathematical foundations for core topics of computer science and extends into the areas of language theory abstract machine theory and computer geometry Computer Mathematics will be of interest to undergraduate students of computer science and mathematics post graduate computing conversion course students and computer professionals who need an introduction to the mathematics that underpins computer science theory Advances on Computer Mathematics and Its Applications Elias A. Lipitakis, 1993 This volume contains selected papers of the proceedings of the first Hellenic Conference on Mathematics and Informatics HERMIS 92 The main theme for HERMIS 92 Conference was Computer Mathematics with special emphasis on Computational Mathematics Operational Research and Statistics and Mathematics in Economic Science The presented papers of the HERMIS Conference have been classified into the following technical sessions Numerical solution of Differential Equations Parallel Processing and Parallel Algorithms Optimization and Approximation Algorithms in Operational Research and Control Theory Statistical Methods and Analysis Mathematics in Economic Science Artificial Intelligence and Data Bases Technology In addition a number of selected research articles published recently in the Hellenic Mathematical Society Bulletin in the form of special issues on Computer Mathematics Volumes 31 and 32 are also included *Introduction to Computer Mathematics* Eleanor H. Ninestein, Introductory Computer Mathematics Nigel P.

Cook,1999-06 For any pre math or quick study course in mathematics for computer technology students This complete math text for computer technology students presents the essentials of mathematics in an interesting and easy to understand manner The first seven chapters begin at the very beginning with fractions and decimal numbers and then proceed to establish a solid foundation in algebra trigonometry and logarithms The four remaining chapters cover computer related mathematics including digital number systems and codes logic gate functions Boolean algebra and binary arithmetic

Computer Mathematics Gordon Buick,1987 Computer Mathematics Deepak Kapur,2008-09-22 This book constitutes thoroughly refereed post conference proceedings of the 8th Asian Symposium on Computer Mathematics ASCM 2007 held in Singapore in December 2007 The 22 revised full papers and 5 revised poster papers presented together with 3 invited lectures were carefully selected during two rounds of reviewing and improvement from 65 submissions The papers are organized in topical sections on algorithms and implementations numerical methods and applications cryptology and computational logic Intelligent Computer Mathematics Jacques Carette,Lucas Dixon,Claudio Sacerdoti Coen,Stephen Watt,2009-07-06 As computers and communications technology advance greater opportunities arise for intelligent mathematical computation While computer algebra automated deduction and mathematical publishing each have long and successful histories we are now seeing increasing opportunities for synergy among them The Conferences on Intelligent Computer Mathematics cicm 2009 is a collection of co located meetings allowing researchers and practitioners active in these related areas to share recent results and identify the next challenges The specific areas of the cicm conferences and workshops are described below but the unifying theme is the computerized handling of mathematical knowledge The successful formalization of much of mathematics as well as a better understanding of its internal structure makes mathematical knowledge in many ways more tractable than general knowledge as traditionally treated in artificial intelligence Similarly we can also expect the problem of effectively using mathematical knowledge in automated ways to be much more tractable This is the goal of the work in the cicm conferences and workshops In the long view solving the problems addressed by cicm is an important milestone in formulating the next generation of mathematical software Intelligent Computer Mathematics Michael Kohlhase,Moa Johansson,Bruce Miller,Leonardo de Moura,Frank Tompa,2016-07-11 This book constitutes the refereed proceedings of the 9th International Conference on Intelligent Computer Mathematics CICM 2016 held in Bialystok Poland in July 2016 The 10 full papers and 2 short papers presented were carefully reviewed and selected from a total of 41 submissions The papers are organized in topical sections according to the five tracks of the conference Calculus Digital Mathematics Libraries Mathematical Knowledge Management Surveys and Projects and Systems and Data
