Three additional names and six greater numbers in brackets on the Maytag Record, at 14-76 in the Selected Number on this same date there, by a change of name as previously. In 1976, year 14-76 and the distinguished Rhode Falls-Lake Farm, Maytag, Inc. in the Selected Number was 14-1400, with a second name in brackets, at 14-76, at 14-1400. In further search the selected year 14-76 was 14-76-1400, at 14-76-1400, which was found for the 14-76-1400 Maytag at 14-76-1400. Several with similar year numbers appear in the last Record.

SERIAL NO.	MODEL NO.
120823 B	B-260 JAOE

The list is further corrected by the last TWO letters in the model designation number, i.e., B-200 is the example, and is sometimes followed by additional letters or numbers. All present models and future production will have numbers only following the basic model number. The lettering system has been discontinued. Due to varied employment of engine sizes, there may be a large number of models. A complete list of these models, referred to as MODEL VARIATIONS, will be found following each Basic Parts List. Under the new system of assigning model variation numbers, the first variation over the standard engine will begin with "100". A typical model number might be 1000-107 for the engine. Model Variations that follow each Basic Parts List will tell what parts or assemblies are used on each variation. The first variation shown is the standard engine and parts listed in the Basic Parts List. In the case of the engine, shown by listing it as Model Variation 100. Following the Basic Parts List for the B-700 engine, the B-700-100 has a greater cylinder stroke and a greater compression ratio and that the gear reducer is omitted in the 1200 psi. If an increase in gear is needed i.e., for the gear reducer, then one must turn to Section II (Accessories) and look up the part under the appropriate assembly number in that case 2000.

You must also determine the basic TYPE of your engine. The TYPE is a Chrysler engine & always shown as a Six-Cyl. FIVE-Valve Cylinder and Head Assembly. 120000 is its max. horsepower.

There will be a separate Division in Section II for each type change of an engine unless it is a special variation of the horsepower of the three basic types.

2. Serial Number suffix "A"—referred to as "Type A."
3. Serial Number suffix "B"—referred to as "Type B," etc., etc.

These are the Model Types and are covered by the Data Parts List. Whenever a part or assembly is not used on all Types, this will be noted. If no note appears, this means that the part will be found on ALL types.
