Kim, Kevin B. Johnson, 2009-07-16

Now is a critical time in pediatric informatics As information technologies electronic health records EHRs personal health records PHRs computerized physician order entry CPOE and standards HL7 are developed to improve the quality of health care it is imperative for policy makers and pediatricians to be aware of their impact on pediatric care and child health Informed child advocates must be at the planning table as national and regional health information networks are developed to insure the unique health care needs of children are being met *Pediatric Informatics Computer Applications in Child Health* is a current digest of the important trends in pediatric informatics written by leading experts in the field This book explores how the management of biomedical data information and knowledge can optimize and advance child health The contributors investigate the specific importance of pediatric informatics is derived from the biological psychological social and cultural needs that the distinguish children from other populations These distinctions create complexities in the management of pediatric data and information that make children a vulnerable population and require the development of a new body of knowledge in pediatric informatics **Department of Health** Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2007-04-17

The National Programme for IT in the NHS the Programme was set up to utilise information technology to help provide high quality services to patients using centrally managed procurement to provide impetus to the uptake of IT and to secure economies of scale Expenditure on the Programme is expected to be 12.4 billion over ten years to 2013/14 Following a National Audit Office report HC 1173 session 2005/06 ISBN 9780102938289 the Committee examined progress made by the Department of Health in implementing the Programme particularly the current status of the shared electronic patient clinical record the costs of the Programme the local management and implementation of the systems within the NHS the extent to which clinicians were involved in developing the systems the management of suppliers and patient confidentiality Four overall conclusions are drawn 1 the piloting and deployment of the shared electronic patient clinical record is already running two years behind schedule and no firm implementation date exists 2 the suppliers to the Programme are clearly struggling to deliver one of the largest Accenture has now withdrawn and the Department is unlikely to complete the Programme anywhere near its original

schedule 3 the Department has much still to do to win hearts and minds in the NHS especially among clinicians and needs to show that it can deliver on its promises supply solutions that are fit for purpose learn from its mistakes and respond constructively to feedback from users in the NHS 4 there is still much uncertainty about the costs of the Programme for the local NHS and the value of the benefits it should achieve
