A Dream of Death Richard E. Ford,2024-09-18 The Great Flood was the worst catastrophe to ever affect the human race it nearly destroyed all life on Earth It is an event that is universally remembered in religion mythology and cultural lore world wide yet factual records and physical evidence of it seem to be lacking In fact though there are many records but most are written in the universal and timeless languages of mathematics and geometry which are to be found recorded in the stones of many of the most celebrated ancient structures around the world it has preserved the records but it has made them difficult to access and interpret After all they were written by astronomers who saw in the heavens the catastrophe that was about to befall the Earth And they knew that only through mathematics and geometry could they transmit their knowledge of this event to the generations that they hoped and believed would follow them in the ages to come it is no idle curiosity concerning an event that occurred so long ago that it is largely irrelevant to the present event that caused this world wide catastrophe will return one day with the same devastating results And as before all life on Earth will be at risk with mass deaths and the distinct possibility that there may not be a recovery and all life will come to an end Here then is what they wrote

The Dream and Human Societies G. E. Von Grunebaum,Roger Caillois,2023-07-28 The study of dreams and their role in human societies particularly within classical Islam provides a fascinating lens through which to understand both individual and collective psychology In medieval Islamic culture dreams were seen not only as personal experiences but as profound communications from the divine or supernatural This belief system imbued the dream with cognitive power often interpreting dreams as forms of prophecy or divine messages a view that transcended the individual's inner psyche and extended into the realm of objective truth Dreams were considered a bridge to understanding the future the Hereafter and the will of God with scholars like Abdalghani al-Nabulus developing elaborate systems for interpreting their meanings These interpretations drew heavily from religious texts such as the Koran and Hadith and offered guidance on a variety of matters ranging from personal conduct to political affairs The significance of dreams within classical Islam is also evident in their societal and political implications Dreams were not only seen as personal revelations but also as instruments of prophecy often used to predict the death of rulers the success of military campaigns or the outcomes of political struggles They were deeply intertwined with religious doctrines with the Prophet Muhammad and various saints appearing in dreams to guide or advise key figures in Islamic history These dream visions were viewed as essential tools for navigating both the personal and political spheres reinforcing the belief that the dream world was closely linked with the divine order The widespread acceptance of dreams as a form of truth is a striking contrast to contemporary Western thought where dreams are more commonly seen as reflections of the subconscious mind In this sense the historical and cultural context of classical Islam elevated the dream to a status that intertwined it with both personal and societal identity suggesting a powerful
