Significant and rapid social, political, technological, and economic changes are taking place in the world economy, and it is increasingly recognised that accountants in all countries play a key role in the process of economic development. Accounting education is undergoing a thorough review on a worldwide basis, and major developments are taking place to produce quality accounting education that can keep pace with dramatic world change. This book provides an up-to-date view of the state of accounting education throughout the world and focusses on the global challenges facing accounting education as we approach the millennium. **Catalog of Copyright Entries. An engaging and comprehensive overview also examining geographical differences. This Companion is split into key sections which explore changing technologies used to represent financial and other data, historical development of accounting theory and practice, accounting institutions and those who perform accounting, accountancy and the economy, accounting society and culture, the role of accounting in the government, protection and financing of states, including chapters on the important role played by accountancy in religious organizations, a review of how the discipline is portrayed in fine art and popular culture, and analysis of sharp practice and corporate scandals. The Routledge Companion to Accounting History has a breadth of coverage that is unmatched in this growing area of study. Bringing together leading writers in the field, this is an essential reference work for any student of accounting, business, and management, and history.
