Democratising Local Government The South African Experiment:

Democratising Local Government, 2002 Local government is at the forefront of development In South Africa the ambitious policy objectives of post apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people An entirely new system of developmental local government has thus been introduced As is the case in many developing countries the responsibilities of municipalities in South Africa have been extended dramatically often without adequate resources Managing municipalities for development therefore requires political will and strategic intervention The book provides a comprehensive introduction to developmental local government It includes the design of the new local government system and the issues posed by decentralisation an overview of specific challenges of urban and rural municipalities a discussion of special issues facing local government including poverty gender and environment new tools for local government including budgeting indicators municipal partnerships and capacity building

Consolidating Developmental Local Government Mirjam Van Donk, Isandla Institute, 2008 Documents the dynamics of local government transformation and captures the key themes of the debates about policy options lessons and key strategic decisions This text is suitable for government officials students researchers specialists community leaders businesses and the general reader

Developmental Local Government Jaap De Visser, 2005 This book concerns the role of the state in achieving development In many developing countries conventional wisdom concluded that development is best achieved through a centralised development strategy The failure of this centralised development strategy has brought about the emergence of decentralisation to local government as one of the means to turn the tide of underdevelopment This book presents decentralisation not only as a manifestation of good governance but also as an indispensable tool towards development The central question however is the following how should the transitional state convert this into constitutional and legal arrangements The author proposes a model for capturing the developmental role of local government in institutional arrangements The new design for local government put forward in South Africa's 1997 Constitution is based on the notion that local government should be the epicentre of development This has prompted the author to use this South African concept as well as the first experiences with the implementation of the new local government dispensation as a case study The importance of the book thus lies in the fact that it produces an institutional model for developmental local government that is not only based on development and decentralisation theories but is also tested in practice It is hoped that those with an interest in the role of the state in development will find the arguments and conclusions useful The book also provides a comprehensive overview of the South African design for local government which is of interest to lawyers policy makers and other parties involved in the implementation of the South African decentralisation strategy Jaap de Visser teaches public law at the Law Faculty of Utrecht University in the Netherlands Until the end of 2002 he worked as a researcher for the Community Law Centre University of the Western Cape specialising in local government law

The Governance of Transitions - The Transitions of Governance Martijn van der Steen,2018-12-12 Why is societal transition not simply a matter of change management or normal policy design South Africa is living proof of the ability of a society to reinvent and reinstall itself With the advent of new societal challenges came the need for real societal innovation especially in sectors where it was never deemed necessary or possible before This book asks What type of governance is helpful for developing new societal institutions and systems that can overcome systemic crises in emerging economies and fragile communities What emerges is a compilation of chapters that introduce different parts of a solution which can be used in developing both a growing body of practices of governed societal transitions and the associated transition of governance The Governance of Transitions The Transitions of Governance in part aims to provide building blocks which government and society could use to develop strategies for creating sustainable outcomes It considers what kind of leadership organisation or methods for accountability enable new types of governance and what the most important barriers are
