Chinese Syntax In A Cross Linguistic Perspective Oxford Studies In Comparative Syntax:

Chinese Syntax in a Cross-Linguistic Perspective Wei-Tien Dylan Tsai, 2014-11-03 Chinese Syntax in a Cross linguistic Perspective is a collection of sixteen original papers by leading experts in Chinese syntax. The papers focus on a broad range of topics demonstrating how the analysis of Chinese can inform our understanding of syntactic phenomena in other languages and how insights gained in the study of other languages can in turn shed interesting new light on patterns in Chinese. Each chapter compares a specific major phenomenon in Chinese syntax with related patterns in at least one other language from Asia, Europe, North America or Africa, resulting in a series of fresh perspectives on Chinese and what the study of Chinese can offer linguists working on other genetically unrelated languages. The volume is divided into three thematic sections: on the nominal domain, the predicate domain and the C domain. In addition to chapters on synchronic adult syntax, the book includes chapters on Chinese diachronic syntax in a comparative perspective and the acquisition of syntax in Chinese in comparison with that of other languages. The collection is a tribute to Professor C. T. James Huang's lifelong work on the syntax of Chinese and his attempts to demonstrate how the comparative analysis of Chinese reveals important properties of Universal Grammar. With its broad cross-linguistic focus and its detailed new studies of Chinese, this book is essential reading for researchers of all language backgrounds in modern generative syntax.

Chinese Syntax in a Cross-linguistic Perspective Yen-hui Audrey Li, Andrew Simpson, Wei-Tien Dylan Tsai, 2015 Chinese Syntax in a Cross linguistic Perspective collects twelve new papers that explore the syntax of Chinese in comparison with other languages.

Nominal Arguments and Language Variation Li Julie Jiang, 2021 Nominal Arguments in Language Variation investigates nominal arguments in classifier languages, refuting the long-held claim that classifier languages do not have overt article determiners. Li Julie Jiang brings the typologically unique Nuosu Yi, a classifier language that has an overt definite determiner D, to the forefront of the theoretical investigation. By comparing nominal arguments in Nuosu Yi to those in Mandarin, a well-studied classifier language that has no overt evidence of an article determiner, Jiang provides new accounts of variation among classifier languages and extends the parameters to argument formation in general. In addition to paying particular attention to these two classifier languages, the discussion of nominal arguments also covers a wider range of classifier languages and number-marking languages from Romance, Germanic and Slavic to Hindi. Using a broad cross-linguistic perspective and detailed empirical analysis, Nominal Arguments in Language Variation is an important contribution to research on classifier languages and the fields of theoretical syntax, semantics, language variation and linguistic typology.

Why is 'Why' Unique? Gabriela Soare, 2021-09-07 Why is Why Unique? Its Syntactic and Semantic Properties considers the behaviour of this peculiar wh element across many different languages including Ewe, Trevisan, Italian, Basque, German, Dutch, Cantonese, Mandarin, English and Hebrew. In ten original chapters, the authors explore various aspects of why questions such as the way why interacts with V2 constructions in Basque, with a subject clitic in Trevisan, or how its morpho-

syntactic make up determines its merge position in Ewe to mention but a few Furthermore a clear cut distinction is established between high and low reason adverbials which are subsequently examined in why stripping environments in Dutch Beyond why proper the book explores a special class of wh expressions in some in situ languages which give rise to unexpected why construals with a touch of whining force The objective is to explain the unusual syntactic position of these wh expressions as well as their association with peculiar pragmatics The questions are addressed for Cantonese are what initial sentences genuine questions To what extent are Cantonese what initial sentences similar to how initial sentences in Mandarin Beside these what as why questions a special class of rhetorical questions the doubly marked interrogatives in Hebrew come under scrutiny Why is why unique also concerns the interface with prosody and several experimental studies investigate precisely this aspect

The Routledge Handbook of Asian Linguistics Chris Shei, Saihong Li, 2022-07-28 The Routledge Handbook of Asian Linguistics provides a comprehensive overview of the ways in which Asian languages should be conceptualized as a whole the distinct characteristics of each language group and the relationships and results of interactions between the languages and language families in Asia Asia is the largest and the most populous continent on Earth and the site of many of the first civilizations This Handbook aims to provide a systematic overview of Asian languages in both theoretical and functional perspectives optimally combining the two in intercultural settings In other words the text will provide a reference for researchers of individual Asian languages or language groups against the background of the entire range of Asian languages Not only does the Handbook act as a reference to a particular language it also connects each language to other Asian languages in the perspective of the entire Asian continent Cultural roles and communicative functions of language are also emphasized as an important domain where the various Asian languages interact and shape each other With extensive coverage of both theoretical and applied linguistic topics The Routledge Handbook of Asian Linguistics is an indispensable resource for students and researchers working in this area

Contrastive Analysis of Chinese and English Syntax Ruixi Ressayi, 2024-02-27 This book introduces a contrastive analysis of Chinese and English syntax based on generative grammar It covers major syntactic domains including but not limited to noun phrases verb phrases the inflectional domain the discourse related domain and ellipsis Based on the empirical data drawn from both Chinese and English and recast in modern linguistic terminology the book introduces various rules and theoretical modules from the generative framework to analyze the similarities and differences between Chinese and English syntax The chapters are arranged such that the book moves from the easiest syntactic topics gradually towards the more complex and advanced ones Each chapter includes a short summary of major points and references for further reading Readers are not required to have background knowledge in syntax The book can serve as a textbook or a reference book for scholars of Chinese studies Teaching Chinese as a Foreign Language TCFL Chinese linguistics comparative linguistics and theoretical linguistics

Prosodic Syntax in Chinese Feng Shengli, 2019-03-27 In the two volumes of Prosodic Syntax in Chinese the author

develops a new model which proposes that the interaction between syntax and prosody is bi directional and that prosody can not only constrains syntactic structures but also activates syntactic operations All of the facts investigated in Chinese provide new perspectives for linguistic theories as well as the insights into the nature of human languages The subtitles of the two volumes are Theory and Facts and History and Change respectively with each focusing on different topics though each volume has both theoretical and historical descriptive concerns In this volume the author first introduces the relevant theories and concepts of Metrical Phonology Prosodic Phonology and Formal Syntax and formulates the Government based Nuclear Stress Rule in Chinese which can explain how and why Mandarin Chinese sentences are structured in a particular way It is proposed that prosody can not only blocks the legitimate syntactic structures but also activates the potential syntactic operations The former can be seen from the ungrammatical sentences that are caused by the inoperable NSR in these structures while the latter can be seen from sentences that are derived from syntactic movements which however are operable only when being motivated by prosody

The Handbook of Chinese Linguistics C. T. James Huang, Y. H. Audrey Li, Andrew Simpson, 2018-03-20 The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics Containing twenty five chapters the book offers a balanced accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years Presenting critical overviews of a wide range of major topics it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area and provide bibliographies for further reading The contributors refer both to their own work in relevant fields and objectively present a range of competitor theories and analyses resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years This unique Handbook is suitable both as a primary reader for structured taught courses on Chinese linguistics at university level and for individual study by graduates and other professional linguists

Parameters of Predicate Fronting Vera Lee-Schoenfeld, Dennis Ott, 2021 Many of the world s languages permit or require clause initial positioning of the primary predicate potentially alongside some or all of its dependents While such predicate fronting where fronting may or may not involve movement is a widespread phenomenon it is also subject to intricate and largely unexplained variation In Parameters of Predicate Fronting Vera Lee Schoenfeld and Dennis Ott bring together leaders in the field of comparative syntax to explore the empirical manifestations and theoretical modelling of predicate fronting across languages There exists by now a rich literature on predicate fronting but few attempts have been made at synthesizing the resulting empirical observations and theoretical implementations While individual phenomena have been described in some detail we are currently far from a complete understanding of the uniformity and variation underlying the wider cross linguistic picture This volume takes steps towards this goal by showcasing the state of

the art in research on predicate fronting and the parameters governing its realization in a range of diverse languages. Covering topics like prosody, VP fronting and predicate doubling across a wide range of languages including English, German, Malagasy, Niuean, Ch'ol, Asante Twi, Limbum, Krachi, Hebrew and multiple sign languages, this collection enriches our understanding of the predicate fronting phenomenon. The Morphosyntax of Portuguese and Spanish in Latin America
Mary A. Kato, Francisco Ordóñez, 2016-10-26. Spanish and Portuguese were Romance languages spoken in the Iberian Peninsula and were brought to America as the languages of the colonizers in the 16th century. Along the centuries, the two languages developed specific properties that distinguish them from the varieties spoken in the Old World. This book offers a rich comparative material which helps us in the understanding of linguistic change and variation.
