Chernobyl Confessions Of A Reporter:

Chernobyl Ihor F. Kostin, 2006 Named the man of legend by the Washington Post Igor Kostin is the main witness of the Chernobyl catastrophe On April 26 1986 several hours after the explosion he flew over the plant the radioactivity was so high that all his films turned black Only one single picture survived it was shown around the world Surprised by the enormity of the disaster and the silence of the authorities Kostin decided to stay and live in the midst of the 800 000 liquidators who followed each other on the site of the accident Himself affected by radiation he did not stop but for twenty years continued to photograph the plant and the forbidden zone surrounding it His story became the story of Chernobyl He witnessed the evacuation of villages the desperation and the courage of the people the construction of the sarcophagus the men transporting radioactive blocks with naked hands the machine cemetery where man no longer belongs For the first time he tells the story in words and in pictures **BOOK JACKET** [Midnight in Chernobyl](#) Adam Higginbotham, 2020-02-04 A New York Times Best Book of the Year A Time Best Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year 2020 Andrew Carnegie Medals for Excellence Winner From journalist Adam Higginbotham the New York Times bestselling account that reads almost like the script for a movie The Wall Street Journal a powerful investigation into Chernobyl and how propaganda secrecy and myth have obscured the true story of one of the history's worst nuclear disasters Early in the morning of April 26 1986 Reactor Number Four of the Chernobyl Atomic Energy Station exploded triggering one of the twentieth century's greatest disasters In the thirty years since then Chernobyl has become lodged in the collective nightmares of the world shorthand for the spectral horrors of radiation poisoning for a dangerous technology slipping its leash for ecological fragility and for what can happen when a dishonest and careless state endangers its citizens and the entire world But the real story of the accident clouded from the beginning by secrecy propaganda and misinformation has long remained in dispute Drawing on hundreds of hours of interviews conducted over the course of more than ten years as well as letters unpublished memoirs and documents from recently declassified archives Adam Higginbotham brings the disaster to life through the eyes of the men and women who witnessed it firsthand The result is a riveting deeply reported reconstruction Los Angeles Times and a definitive account of an event that changed history a story that is more complex more human and more terrifying than the Soviet myth The most complete and compelling history yet The Christian Science Monitor Higginbotham's superb enthralling and necessarily terrifying extraordinary The New York Times book is an indelible portrait of the lessons learned when mankind seeks to bend the natural world to his will lessons which in the face of climate change and other threats remain not just vital but necessary *Tickle Your Catastrophe!* Frederik Le Roy, 2011 A collection of essays that takes stock of the current impact of the image and imagination of the catastrophe in art science and philosophy *The Meanings of a Disaster* Karena Kalmbach, 2020-12-07 The disaster at the Chernobyl nuclear power plant was an event of obviously transnational significance not only in the airborne particulates it deposited across the Northern

hemisphere but in the political and social repercussions it set off well beyond the Soviet bloc Focusing on the cases of Great Britain and France this innovative study explores the discourses and narratives that arose in the wake of the incident among both state and nonstate actors It gives a thorough account of the stereotypes framings and othering strategies that shaped Western European nations responses to the disaster and of their efforts to come to terms with its long term consequences up to the present day

Dispatches from Dystopia Kate Brown, 2015-05-01 Why are Kazakhstan and Montana the same place asks one chapter of Kate Brown s surprising and unusual journey into the histories of places on the margins overlooked or erased It turns out that a ruined mining town in Kazakhstan and Butte Montana America s largest environmental Superfund site have much more in common than one would think thanks to similarities in climate hucksterism and the perseverance of their few hardy inhabitants Taking readers to these and other unlikely locales *Dispatches from Dystopia* delves into the very human and sometimes very fraught ways we come to understand a particular place its people and its history In *Dispatches from Dystopia* Brown wanders the Chernobyl Zone of Alienation first on the Internet and then in person to figure out which version the real or the virtual is the actual forgery She also takes us to the basement of a hotel in Seattle to examine the personal possessions left in storage by Japanese Americans on their way to internment camps in 1942 In Uman Ukraine we hide with Brown in a tree in order to witness the annual male only Rosh Hashanah celebration of Hasidic Jews In the Russian southern Urals she speaks with the citizens of the small city of Kyshtym where invisible radioactive pollutants have mysteriously blighted lives Finally Brown returns home to Elgin Illinois in the midwestern industrial rust belt to investigate the rise of rustalgia and the ways her formative experiences have inspired her obsession with modernist wastelands *Dispatches from Dystopia* powerfully and movingly narrates the histories of locales that have been silenced broken or contaminated In telling these previously unknown stories Brown examines the making and unmaking of place and the lives of the people who remain in the fragile landscapes that are left behind
